Bank Card Wins Wide Acceptance

Sales volume on the Master Charge bank credit card is currently 3 1/2 times ahead of expectations, it was announced today by Garrison A. Southard Jr., executive manager of California Bankcard Association.

"The acceptance of this new credit card is, to our knowledge, unmatched in the credit card field," Southard remarked. "In just three months since its introduction, nine additional banks have joined the Master Charge program, 5,000 new merchants have signed up, and approximately 300,000 new card holders have been registered," he stated.

The Master Charge program now embraces 79 banks and approximately 75,000 merchants and services in California.

Bank Card Wins Wide Acceptance

"IN ORDER to keep pace with the ever growing use of the Master Charge Card, our association service staff has been increased to 130 people. We have installed a new computer to process sales receipts four times faster than the original equipment. Despite the extraordinarily high usage of the Master Charge Card, cases of fraud and theft are at a minimum," Southard said.

Southard continued, "There are several reasons for this enthusiastic acceptance of the Master Charge Card: people like to have a choice... until Master Charge came along, Californians had a limited choice in bank credit cards. Also the strong loyalty which consumers and merchants have to their individual banks has been most helpful. Our member banks have done an outstanding job in establishing the Master Charge program in cities and small towns throughout the state. Lastly, the great competition among the member banks in signing up merchants and card holders has been an important factor in the outstanding success of the program."
